SUMMARY

ACE contacted Thames Water on 0845 850 2777 to request for records of historical flooding at the above mentioned site. TWU checked their records and confirmed that there were no records of sewer flooding since 2007 and no other issues were found. They were unable to provide the information before 2007. ACE requested for a written confirmation, however, TWU advised ACE to write an email to customer.feedback@thameswater.co.uk for a formal confirmation and to enquiry for the information prior to 2007.
