Planning application number..... 2014/7098/P.....

Planning application address.....

I support the application (please state reasons below)

I object to the application (please state reasons below)

Your comments

I have no objection to the roof terrace but I have been informed that application has been made to erect a full ground floor extension on the existing patio and it is to this that I object for the following reasons.

1. The proposed extension will not affect the daylight ^{entering} entering our patio but it will have a serious effect on light entering the house and patio of number 28.
2. The building if permitted will take months to complete and will make the communal garden almost uninhabitable. This will cause hardship to those who use the garden particularly families with young children.
3. The main objection is that the proposed extension will alter the character of the garden. (This does not apply to an ~~an~~ already permitted extension which impinges on a border ^{rather than} the garden.) In 1999 the Council refused planning permission for a similar proposal (Council reference EN 981174). At that time the inspector wrote "The private patios contribute to the feeling of openness... this could easily be eroded and the amenities provided easily reduced". This certainly applies to the present proposal.
