2014/7567/P	Kevin Flack	16a Carlingford Rd London NW3 1RX	13/01/2015 22:46:43	INT	<p>It appears from the current plans that permission is not being requested for access for the upper flat to the roof area of the extension for use as a roof terrace. We would object strongly to such a request on the basis of diminished privacy in the rear bedrooms and garden of our flat.</p> <p>The plans currently do not show any windows in walls adjoining the boundary with 16 Carlingford Road. We would object if the intention is to have windows in these walls on the basis of diminished privacy in the rear bedrooms and garden of our flat.</p> <p>We note that the plans will change the use of the interior area adjoining our flat at the rear of the premises - what is currently a bedroom will become the kitchen and a bathroom. We trust that adequate soundproofing will be installed to avoid additional disturbance due to the new use.</p> <p>The construction process will no doubt lead to high levels of noise disturbance and we would request that this is limited to weekdays and that no construction work takes place at weekends or on bank holidays. In addition we note that the work is likely to create significant disturbance in our garden (for example the removal of the existing fence and earthworking / retaining wall construction required by the proposed plans). We would request that this is carried out considerately and we are engaged.</p>
