2014/7687/P	B Bennett	156 Agar Grove London	21/01/2015 14:53:53	OBJ	<p>Dear Jonathan McClue</p> <p>I am writing to object to this proposal. The planned 2 storey rear extension is extremely bulky and enormous, would not fit in with the style and would detract from the character and appearance of this conservation area, clearly visible from the back. Unaltered backs of this important Camden 19th century street are rare survivors and it would damage the conservation area to demolish the surviving brickwork walls and remove and destroy original timber framed windows. This building with others has at present an attractive delicate layout of windows. The proposed aluminium double glazed patio doors/windows are not suitable in style, shape or material for this Victorian building and do not match or fit in with the traditional architecture.</p> <p>There is already a problem with noise at the back of Agar Grove and a roof terrace could lead to extra noise and loss of privacy of the surrounding residents as it would overlook properties.</p> <p>Taking away open area at the back of this property would deny future use as a garden and removing open ground can lead to flooding and water run-off problems.</p> <p>Please let me know any committee dates.</p>
