2014/7951/P	rick waller	26 ryland road nw5 3eh nw5 3eh nw5 3eh	27/01/2015 15:30:28	OBJ	<p>I would like to object to the planning application for a roof top extension at Imperial Works on several grounds as follows:</p> <p>Until approx 8 years ago, Ryland Road was a quiet residential and office street. However since that time there has not been a moment when the whole street has not been subject to extreme sound and air quality pollution due to building works for which planning permission has been given. These include the works done to Ryland House, Imperial Works, The Brinsmead, Nadav Kanders studio extension, The Kentish Town West platform extension, the house conversion within the grounds of The Brindsmead. A respite from this reduction in life quality is long overdue.</p> <p>All Ryland road residents lose the sun over the roof of Imperial works quite early in the day. A roof extension will bring this moment even earlier in the day. I therefore object on the grounds of reduced light to my house and others on the street.</p> <p>It is well known that Imperial Works intends to convert use to residential, and one such application has already been rejected. The style of the intended roof extension looks very suited to a future change of use. As we saw with Brinsmead, it was only allowed to fully convert to residential use after several planning applications. One cant help thinking that a repeat situation might happen here. And I must say there is not one resident of Ryland Road, to my knowledge, who would not object in the strongest terms to a change of use at Imperial Works.</p> <p>On occasion, residents of Ryland Road have had application for dorm loft extensions rejected by your office. There would be a lack of parity and fairness should a much larger and more obtrusive extension to Imperial Works gain the permission it is seeking.</p>
