I object to the application (please state reasons below)

Your comments

JAN. 2015

I am an artist and use my north-facing, first-floor room as a studio. This room faces 16-28 Lower Merton Rise and would consequently be affected by the proposed roof-extensions, since the levels of natural daylight would be greatly reduced. I should also be deprived of the natural daylight benefit, affecting both my health and my ability to paint.

I note that this application has been made by only four of the seven owners. If the other three owners do not want roof extensions on their own properties, will this application succeed? If the houses are too small for the four owners, perhaps they should be encouraged to move to larger premises, rather than detrimentally affect the environment for both Camden's residents and visitors to the area?

We all appreciate and benefit from Camden's judicious policies in preserving the local environment for everyone, including the preservation of natural daylight and what sunlight is available.

Please continue on extra sheets if you wish

I own no 11 & 13 Lower Merton Rise & live opposite the proposed work. I support the application. The design would mirror the top storey of our houses. There should be no adverse impact on neighbours either in sunlight terms, or overlooking. I can be contacted on email or telephone with any information required.
