Summary of representations

(Officer response(s) in italics)

The owner/occupier of Flat 12, 25 Gresse Street has objected to the application on the following grounds:

Residents at 25 Gresse Street have put up with enough noise and disruption over the years.

Summary of comments

The application is for the installation of a 3.7m satellite dish on the roof top of 1 Stephen Street. There are currently 15 satellite dishes already at roof level. The addition of another satellite dish would not increase noise to the surrounding area. The position of the satellite dish within the middle of the

roofspace would mean that it would not be visible from street level. It is likely to only be viewed from other higher level locations. The only disruption which may be caused is when the satellite dish is installed. This process is not likely to take longer than a day. As such it is not considered that it would be to the detriment of neighbouring properties. The proposal is considered to be in accordance with Development Policy DP26 of the London Borough of Camden's Local Development Framework.

Recommendation:-

Grant planning permission
