2014/7803/P	wendy carroll	Antrim Mansions	29/01/2015 22:14:41	OBJ	<p>The application is extending a building which already is trying to accommodate a number of people in small space with no outdoor facilities or parking. The building is already no well maintained with broken windows and rubbish on the roof and often on the street outside the building. The building will significantly affect the surrounding buildings in terms of light, noise and privacy and there will be the impact on increase use on the surrounding area. It is questionable why this is a good site for such a development. It does seem that it is generating money from private development without consideration of that the accommodation that is being reduced would be better accommodated in a more spacious location. It also does not consider the parking for more residential use in what is already a very developed site.</p>
