2014/6297/P	Janet Walsh	7 Colonnade London WC1N1JA	30/01/2015 12:46:21	COMMNT	<p>I have the flat above the office involved in this planning application and I would be most distressed if these security shutters were removed. They give a strong feeling of safety in this small mews road. If they were no longer there it would again attract thieves and burglars to the mews, who know this is a very quiet road where their activities would not be noticed.</p> <p>Clearly the council is concerned about the appearance of these lovely old buildings, but the shutters are usually only rolled down in the hours of darkness (when they are needed) so the normal attractive appearance of the mews is not affected during the daytime, which is really the only time one can appreciate the historical nature of the buildings anyway.</p> <p>To be honest, I really don't think the shutters are unattractive anyway.</p> <p>I do hope the council will take a common sense attitude to this, recognise the value of local small businesses and the pressures they are under, and recognise too that it is in the interests of residents like me to have the highest possible protection from the attentions of burglars.</p>
