2015/0274/P	Peter Storfer	Flat 1 39 Swinton Street London WC1X 9NT	30/01/2015 15:40:51	OBJ	This proposal to add a substantial dormer floor to the building, which is in a row of Grade II listed buildings. This proposal appears to fail on its face, as it substantially changes the appearance and characteristics of this row of buildings. In particular the dormer windows which have already been installed prior to planning approval change the aspect and image of the East side of the building, which has already suffered from changes made without planning permission in previous years. Hence, I object to this proposal.
