2014/7709/P	Jenny McCririck	10 Albert Terrace Mews	02/02/2015 09:51:02	COMNOT	<p>The tree in the garden - walnut - has a preservation order and must be preserved. We are very worried about the subsidence in the Mews - please refer to houses which have been underpinned -amongst them mine at no 10 next door and the Redesdale house at the end of the garden facing the property. There is substantial water running under the mews and a well in the garden of the house no 19</p> <p>You can see subsidence outside no 20 in parking space and the road is subsiding outside no 19 opposite the property.</p> <p>The road outside 21 is subsiding badly where THAT house was excavated without permission. The access to the Mews is so narrow and difficult that we need access at all times for emergency vehicles through the Mews entrance by 11 and not blocked for hours by builders. skips/lorries.</p> <p>The houses on Regents Pk Rd backing on to this property have been underpinned and are on a higher level with the land sloping down to no 11 which surely is dangerous re subsidence.</p> <p>I await your comments. jenny McCririck</p> <p>I wish to add that these people have been been working up to the party wall with no 10 and refuse to complete a party wall notice.</p>
