Your comments on the planning application

The Royal Free is a wonderful hospital, both my daughters were born there, but the proposal for extending the Royal Free is just too ambitious - the site may fit the proposed building but it will take away the green space currently there, which I often see used by patients. Studies show that people recover more quickly when they can see trees/green. How counter-productive to take them all away. The hospital is already challenged by the amount of traffic in the area and the limited road access around it as it is. This can only get worse. It would be impossible to improve through flow - there simply isn't room to widen roads/build more. The

### Planning Application Details

pictures of the proposed extension to the hospital are truly ugly. Hampstead is an area of outstanding natural beauty/history. Surely any design must be sympathetic to this. The project is just too big. St Stephen's Church/Hampstead Hill School are so close to this development that both would suffer from digging/light restriction/pollution. There will be nothing less than gridlock for the duration of the building works. I have lived in Hampstead for well over a decade. I really do not think the massive extension of the Royal Free will be good for Hampstead or its residents and I strongly advocate that you relocate the proposed building/scale down the size/change the design so it isn't an eye sore.

Your comments on the planning application

I object to the location of the Royal Free's planned Institute of Immunology and ask that a relocation is considered. It is too close to Hampstead Hill School. The project will among other have the following negative impacts:

- it poses a significant risk to the school's buildings, in particular to St Stephenâs and St Stephenâs Hall
- during the building process, it will have significant impact on the health and safety of the children through pollution
- the future building will overshadow the school, diminishing the sun exposure of the playground, which is detrimental to the children's well being.

Your comments on the planning application

We do not want the Royal Free Hospital to locate their Institute of Immunology next to Hampstead Hill School. We are concerned about the traffic, the risk to St. Stephen's and St. Stephen's Hall and about health and safety of the children. Another concern is the pollution. Please don't risk that our children are not safe and get sick. We would strongly recommend the relocation of the proposed building to an other area.
