Dear Sir

We object to the proposed loft conversion in particular because it proposes to increase the height of the roof. We do not want to have the increased noise opposite, lights that come straight into our property, and increased obstruction to natural light in our property. We already have some experience of neighbours opposite having late night parties in their rooms in the loft and they are disruptive. These dramatic loft conversions change the character of our traditional properties and in light of the size of the houses already are unnecessary. We should be preserving the unique character of these streets not destroying it.

Kind regards

Danuta and Ania Farren
