Toughened Glass

Compared to normal glass, thermally toughened safety glass has the dual benefit of sustaining high impact working pressures and a high temperature differential between the two faces.

Thicknesses available 2, 3, 4, 5, 6, 8, 10, 12, 15, and 19mm.
Please note: thicknesses 3mm or less are not toughened to a British Standard.

Minimum sizes available:

from 15mm square / 15mm diameter upwards

Tolerances (standard):

+0.25mm - 0.25mm

(fine tolerances) +0.10mm - 0.10mm
