2015/0090/L	Andrew Dutson	61 A Endell street	09/02/2015 17:48:54	COMMNT	I believe that the windows installed in the existing maisonettes do not conform to the existing planning permission that was granted about ten years ago. They open onto the courtyard and people can look out and are often very noisy. Also there is a very large black chimney that has been erected at some point which is extremely ugly and very noisy to all the residents at 61a Endell street. If there is no planning for the chimney then enforcement that it is taken down is needed. Also the new windows need to comply with previous listed building and planning consent. There is also a mobile air conditioning unit at ground level which I also believe fox not have permission.
