2015/0098/P	Bill Butcher	apt 23 1-10 Summers Street London EC1R5BD	04/02/2015 11:41:39	COMMNT	<p>Dear Ms Chivers, Regarding the installation of a new condenser unit and erection of an enclosure at roof level, I am concerned about the installation of the condenser as I live in the building directly next to 144a Clerkenwell Rd in a residential building (address below).</p> <p>My concern is that there are already condenser units situated on the roof level of 144a which give off a certain amount of background noise, particularly when they are left running through the night.</p> <p>My bedroom along with other residents in Summers street is situated very close to vicinity and rooftop of 144a, probably no more than 5 metres away therefore adding another condenser unit will only increase to the background noise level.</p> <p>Kind Regards Bill Butcher</p>
