Dear Sirs

*re new window proposed in bedroom no 1 on the 1st floor*

I like to object to the new south facing window, which is applied for on 1st fl at no 12 Maryon Mews. It would be totally overlooking my garden, depriving me of my privacy. This does also partly apply to my glass extension in which I live.

I understand that the owner wants more light in the bedroom. This can easily be achieved with a Velox window in the bedroom roof or alternatively with a fixed frosted glass pane with a narrow small hinged top window facing South which can be opened for airing. But it should also not be transparent.

Best regards  
Marion Wesel
