2015/0233/P	Dorothy MacDonald	15 Parliament Hill Flat 2 NW3 2SY	18/02/2015 19:57:53	OBJNOT	There is no history of basements on this side of Parliament Hill. This is overdevelopment of the site and would lead to prolonged noise, disruption and dirt in the area. There would be greatly increased traffic with heavy construction vehicles and earth excavating and moving equipment for a considerable time. Destabilizing of properties in the vicinity in an area already prone to subsidence. Alteration of underground water flow and water table in an area of many underground water courses causing problems for the surrounding houses.
