2015/0357/P	Daniel Loft	Flat 3 2 Frogna1	20/02/2015 10:17:01	SUPC	<p>Dear Sir,</p> <p>We write in relation to the additional planning application for two flats (ground floor and basement) at 2, Frogna1.</p> <p>We support the application, but would ask for the following points to be taken into consideration.</p> <p>(1) Sympathetic development, within the style of 2, Frogna1 and the rest of the Frogna1 and Fitzjohns Conservation Area (in which the property resides).</p> <p>(2) High level of acoustic insulation throughout the two new flats (floors, ceilings, windows / doors, shared voids / conduits etc. such as chimneys) to prevent the transfer of both airborne and structural originating sound and vibration through the existing fabric of the building.</p> <p>With potentially twice as many residents as the original plan approved previously, this is of increased concern.</p> <p>Yours faithfully, Daniel Loft</p>
