2015/0580/P	Paul Harris	46 Swains Lane Highgate N6 6QR N6 6QR	21/02/2015 13:36:57	COMMEM AIL	<p>We are concerned that the level of noise and dust created by the demolition activity and subsequent building works will restrict access to the garden for ourselves and those neighbours directed affected, particularly during the spring and summer months when we want to make more use of the open space to the rear of our properties.</p> <p>There is no detail given to the size of the ground floor extension, however there is an existing extension that was only recently erected? A disproportionate ground, full width extension which extended further into the garden area, may cause damage to root systems of long established pear trees which are located in the vicinity.</p>
