Subject: New Application Comment. 2014.7778.P Tulloch- 6 Streatley Place

Dear Rob,

I see that the applicants for Planning Application 2014.7778.P 6 Streatley Place have submitted revised drawings and a revised Design and Access statement. However, the revisions still fail to identify the bedroom window at my property that will be 4 metres away from the large glass doors and windows of the new building's common living areas.

They take the time to identify windows in the other neighbouring property but not the window closest to the development. Why?

Sincerely,

Max Trautman
