26th February 2015

Dear Sir/Madam,

Application for Planning Permission for Abbot's Place, LONDON NW6 4SS

Please find attached the above application. The site is a small area of land to adjacent to the garages to the North West end of Abbot's Place.

The proposal is for the erection of a motorcycle shelter.

The site is currently a slightly raised unused and derelict area of ground with a dwarf wall fronting Abbots Road in a poor state of repair.

It is proposed to erect a small lockable motorcycle shelter – the walls are proposed in painted brick to match the recent new building immediately to the east. There is a motorcycle parking bay directly adjacent to the site.

The ground is proposed to be lowered to pavement level and access will be via the existing dropped kerb and cross-over serving the garages. We believe the proposals will improve the amenity and general aspect of the site.

Please contact us if you require any further information or clarification.

Yours faithfully,

David Anderson
