2015/0509/P	D Bevan	42 st pauls crescent nw1 9tn	01/03/2015 18:18:29	OBJ	<p>I object to the proposed build.</p> <p>The plan makes no reference to the telegraph pole that will need to be moved for this, there doesn't appear to be a suitable position to relocate this and it will cause disruption to the businesses and residents connected to it.</p> <p>The plan says there will be no loss of light to my property, this is clearly incorrect, I calculate that there will be 1.5 hours of lost sunlight to the property daily throughout the summer and we will never be able to view the sunset from here again.</p> <p>It appears to conflict with Camden's green credentials as there is provision for too many vehicles, when all other properties have only one space, does this property really require 4? indeed including the free space in front of the property would give them 6 spaces.</p> <p>The roof light windows proposed will have a view into my bedroom window. I would consider this a breach of my privacy.</p> <p>I believe the brass cladding would bring a cheap and tacky look to the area and be an invitation to thieves as it would have scrap value. I hope that suitable lightning conductors are specified as this would present a serious risk.</p> <p>I hope you will consider my objections and reject the proposal in its current form.</p> <p>Regards.</p> <p>D. Bevan</p>

2015/0509/P	Melody Thomson	40 St. Pauls Crescent London Nw19TN	27/02/2015 14:52:38	APP	<p>I am extremely opposed the application on several grounds. We had to put up with the noise and construction dirt of the original build for nearly 3 years and now they want to start again!!! We do not believe there is any need for this addition and we are extremely concerned for our light being diminished as well as the potential of staring at a great big hideous brick wall!!! we are extremely unhappy about the fact that it would be 2 stories when one would certainly suffice. We do not wish to be overlooked and our privacy encroached. .There are at least 3 neighbors who have voiced onjections to this application and we wish to be consulted.</p>
