2015/0842/P	Mr and Mrs J Wood	Ground Floor Flat 6 Ingham Road London NW6 1 DE	10/03/2015 07:07:11	AMEND	<p>We are the next door neighbours and although we are not objecting in principle to the extensions we do wish to comment on certain criteria. This only refers to the side extension proposal and not the rear extension. We do not wish that the original boundary wall which divides no. 4 and no. 6 and has existed since the properties were built in the late 1890's be removed or modified. Also we would prefer that the roof of the new extension slopes down from the side of the property giving an equal height of 2.36m running along the boundary wall. Currently the plans show that a wall height of over 3 metres will start directly next to our back door with a general decline down to 2.36m. We feel that this will obstruct light from our back door and also create a tunnel effect looking down the side of our property. Our line of vision looking out of our property will definitely be severely compromised. Also any exposed brickwork from the proposed extension that is visible from our side of the property should be in the original brickwork of the building namely of London Stock and also slate coloured tiles. We would also like to put on record that the intended works will undoubtedly create severe disruption to our enjoyment of our outside space creating a high level of noise, dust and privacy during the summer months. This is due to the very close proximity of the outlined works.</p>
