2015/0886/P	Mr & Mrs Guy	4 Upper Terrace	05/03/2015 12:12:07	SUPPRT	<p>We believe that this application is a good example of sustainable, sympathetic redevelopment of a listed property that should be supported by the planning process for the following specific reasons:</p> <ol style="list-style-type: none"> 1)The footprint of the existing building is not excessively increased by the proposed development, particularly in comparison with the size of the property's land. 2)The proposed construction is in keeping with the existing property, the materials used, and construction techniques will blend in well. 3)The proposed building extension replaces a number of ad hoc, cheaply constructed temporary buildings which do little to enhance the building or the area. 4)There is minimal impact to the surrounding environment, including trees. 5)The construction plan utilizes the site well in order to cause minimum disruption to the surrounding properties and access roads. <p>We feel the points above set a good example of considerate, appropriate, construction, and should therefore be supported.</p>
