Why would you want to spend money to rebuild extra storage to balconies when you can offer garages for free, or for less than it will cost you to build extra units?  
More balconies are far from practical in this weather, or rain or snow, all goods will be damaged.  
Why not allocate extra vacant garages as I said, even if 2 people need to share one garage!?!? The tenants offer!

Please continue on extra sheets if you wish

I am fully in support of the plan to install additional storage to the balcony of my flat.

The planned installation will not affect my neighbour and it will not block sunlight entering my flat.

It will help me store away my luggage safely.

please give permission to install the facility

Thank you
