Your comments

31 years ago the Builder/Developer (Mark Fitzpatrick & Sons Ltd.) of our houses (93, 93a, 95, 95a) was made to build one metre back from the kerb.

What happened to that rule?

The same Developer installed an aerial distribution box on the side wall to feed all above houses. This will have to be moved, as well as my air condition unit on the same wall.

Where will they be re- located to and who will pay?

As no garages are proposed there will be even more cars for our already crowded Mews!

If the proposed property terrace extends beyond mine it is of concern. This will either impinge on my privacy or light or both.

Yours sincerely, [REDACTED]
