Dear Mr. Stark

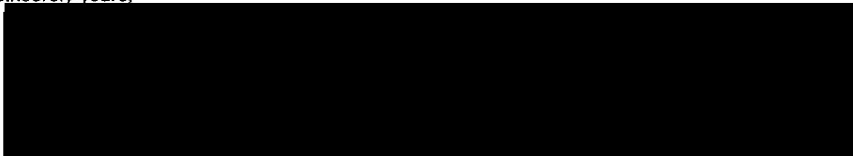

Re: Planning application for 3 Arkwright Road

We have been residents of Hampstead since 2001 and our son attends St. Anthony's School. We strongly support the expansion of St. Anthony's to 3 Arkwright Road. We only regret that as our son is already in his last year at the school, we will not benefit from the many advantages that this new project will bring to the school and the community, including the following:

1. More badly needed school places for an ever increasing number of children.
2. Considerably improved child safety due to fewer crossings of Fitzjohn's Avenue, as children won't have to go back and forth on the street between buildings several times a day for meals, sports and games and classes.
3. Peace of mind for parents and better use of school staff's time, as the small children will be in one building throughout the day and staff can devote their time to teaching instead of tracking children's locations.
4. Better traffic flow at the junction of Fitzjohn's Avenue and Arkwright Road, as there will be fewer parent trips back and forth collecting children from one building and taking them to after school activities at another.
5. Better use of students' time, as much learning time is currently wasted several times a day by lining up to cross the road to the other building.
6. Fewer traffic blockages during the school run, as parents would be able to drop off and pick up their children of different genders with one stop, whereas they must now park, take some children into one school and repeat the process again at another school only a few blocks away.

We do hope the planning application for this worthwhile project is succesful, as it will benefit many families.

Sincerely yours,
