**Subject:** Planning Application 2015/0441/P

I object most strongly to this application.

The heavy HGV traffic alone renders this application unacceptable. The damage to the road to the site is clearly predictable. In addition the lorries will be unable to turn and will therefore have to reverse out in to Merton Lane with all the consequent inconvenience and danger to other road users - cars, walkers, dogs, children, bicycles - is all too obvious.

I suggest that the consequences of a 15m deep excavation are all too predictable.

I also suggest that the contractors' cars will take up any available parking space, preventing the normal necessary parking availability for swimmers, walkers, fishermen, etc.

I call upon the London Borough of Camden to reject this horrifying and anti-social application, on behalf of all Heath users.
