2015/1354/P	John Nicholson	6 Raglan Street Kentish Town London NW5 3DA	29/03/2015 13:11:37	SUPC	<p>Broadly we don't have an objection to the extension as proposed in terms of height, massing, depth.</p> <p>However we have an objection to the proposed white colour of the brickwork. From our perspective looking at the property from our house at ground, first and second floor, we look straight onto the rear of the property. The line of properties on either side of 46 Alma St are London brick (or as near as in terms of colour and material) and breaking this at the first floor level with white brick ruins the unity of the perspective.</p> <p>In terms of preservation of unity of colour and materials of the adjoining properties, we request that all of the first floor walls be constructed of London brick (or its nearest equivalent).</p>
