

8, Gayton Crescent
London NW3 1TT

Application Ref: 2015/1168/P

29 Mar

Dear Madam,

I would like to comment
on the planning application
for works to be carried out
at 37 Rudall Crescent, NW3 (RR).

I am against the proposal
to install 'roof lights to the rear
roof pitch'. Obviously these
lights will come on during the
hours of darkness, + as such
will shine onto the rooms at
the back of my house, + my

next door neighbours. I am particularly worried about my son, whose bedroom is at the back of my house facing Rudall Crescent, & may have bright lights shining into his window at night, making it hard for him to sleep & disturbing his sleep pattern.

Also, my living room faces Rudall Crescent, & as Autumn approaches & it starts to get dark earlier in the afternoon, I am worried that these lights will come on & shine directly into my room, making me feel illuminated against my will.

- 2 -

Apparently, the 'Light + Neighbourhood + Environment Act' says something to the effect that lights from someone's property must not shine directly onto someone else's property.

As far as I know, no one else on that side of Rudall Crescent has such lights, we have never seen any in the many years I've lived here, + I do hope you will reject the Application'

Yours faithfully
