Dear Sir/Madam,

This concerns the planning condition specific to archaeology in application 2013/2798/P for change of use of 14 Roger Street, London WC1N 2JU.

The recommended archaeological recording work on site comprising sections A, B and C have been completed by Pre-Construct Archaeology Ltd. Attached you will find a copy of the assessment report which outlines our findings and details of the required analysis, publication and archiving elements of the archaeological intervention. Section C (A) which states: *'the provision made for analysis, publication and dissemination of the results and archive deposition has been secured'*, has been adequately provided for. Chris Dyson Architects LLP has put in place adequate resourcing for Pre-Construct Archaeology Ltd to proceed with and finalise the analysis, publication and dissemination of the results and deposition of the archive. These final aspects of the work on the project are currently progressing (a first draft of the publication text is near completion) and will be completed before long.

Please address any matters of clarification or further explanation with the undersigned.

Yours sincerely,

Frank Meddens BA Ph.D FSA MIFA
Director Post-excavation Projects
