Any high building of a wall extension that will obstruct the light in my kitchen I would object to it being built. On the other hand if they are able to build in such a way that will cause little light obstruction to my kitchen I have no objections to that. As neighbours I always thought it was polite to inform & talk with neighbours regarding ^{this} there was a quick mention of it to me but no detail. Please make sure that London stock bricks to match my wall are used in the extension. I will not accept new bricks or the wrong colour.

Please continue on extra sheets if you wish
