2015/1274/P	Christina Oates	Flat 36 Winter garden house Macklin st WC2B 5ND	08/04/2015 17:18:39	COMMNT	<p>I live on the eighth floor of the block of flats 'attached' to the New London Theatre and am directly above the area where they currently have air conditioning units which are very noisy in the summer. I note that this application is not to replace these units but to add to them.</p> <p>My concern is that the new units will just add to the noise nuisance we already suffer. I would ask that the granting of planning permission be dependent on the current units being upgraded and silenced! And that, of course, the new ones meet the strictest criteria for the containment of noise.</p> <p>Thank you</p>
2015/1274/P	Michael Otsuka	61 Winter Garden House Macklin Street WC2B 5ND WC2B 5ND	08/04/2015 16:23:23	OBJNOT	<p>In the past, the New London Theatre has not been a good tenant, when it comes to problems with noise. There has been a persistent problem of rattling and pinging noise from the air conditioning cowlings that is currently situated on the 7th floor roof and with their cowlings situated elsewhere. The New London Theatre should be granted permission to install these new units only if this results in an overall reduction of noise to Winter Garden House tenants to an acceptable level, including the noise from existing cowlings. They should not be given permission to install new units if these will be in addition to the existing units.</p>
