I am a long time resident on the Hillview Estate WC1 and would like to register my objection to the above proposed changes to the town hall extension. The proposal indicates that the building will rise considerably in height both blocking out light for those living in the area and attending Argyll School as well as completely blocking out St. Pancras Station clock. This is a high density residential area and the proposal does not appear to take account of the quality of the environment for those living and attending school in this area.

Sheila M. Scott
