Dear Hannah,

**Re: Camden Lock Village – Building E Drainage Philosophy Statement**

The Drainage Philosophy Statement submitted for the Building E planning application is the updated Drainage Philosophy Statement for Camden Lock Village.

The drainage strategy for building E is integrally linked to that of the site wide drainage strategy, hence the reason for the resubmission. Please note the following:

- The report has been amended to support the planning application for building E and the drawings have been updated to include the building E area.
- The foul water strategy for building E has been added.
- Surface water strategy for Building E is the same for the rest of the buildings – this has been stated in the report.
- It should be clear from the drawings and report that building E has been incorporated into the site wide strategy.
- The drainage calculations are unchanged as an allowance for building E was already included.

Yours Sincerely,

**DANIEL SMITH**  
Engineer
