2014/7869/P	Nick Reeve	37 Heath Street NW3 6TR	13/04/2015 13:25:06	COMMNT	I own a property and have a back door in the immediate vicinity of this proposed installation. As such I have concerns about any additional noise that this pump may bring into my home, as well as any emissions it may give that may cause issues when my door or windows are open. It also refers to the installation being elevated but I could not tell from the drawings how high. Ideally I would not want this to be visible or an eyesore on the building.
