I support the application (please state reasons below)

I object to the application (please state reasons below)

Your comments

The new teaching building is a large building that will stand 10m from our boundary and will be approx 12-13m tall. We have the following concerns:

1. loss of outlook from garden/back bedrooms - Is it not possible for the new building to be placed a little further from the boundary?
2. loss of privacy - There are operable windows on the top and first floor of the new building facing us that will overlook our garden/back bedrooms. Could these be non-operable/opaque?
3. Noise
 - The ground floor windows of the new building facing us are operable and are marked as music/drama rooms. Could these windows please be non-operable as other windows are available.
 - The area next to us is marked "Hard Social" space but there is no mention as to how the school plans to deal with the boundary generally so we can assess both noise and noise privacy. Could the school consider that please.
 - There is no mention of an AC plant. Could any such plant please be far removed from any boundary as it will be noisy.
4. Red render on facing wall - This will be bold. Could a more neutral colour be considered please.

Please continue on extra sheets if you wish
