2015/1380/P	Johanna Bendrey	7a Hemstal Road	13/04/2015 20:06:50	OBJ	I wish to oppose this application. I responded to the initial application and received no response. I am in the basement flat at 7 Hemstal Road and am concerned about restriction to light to my property. Also the noise and debris during building will cause disruption. I am disappointed there has been no response to my initial comments submitted via post where I made a request to have the applicant pay for an independent surveyor of my choice to assess the impact such an extension could have on my property. I therefore object to this application.
2015/1380/P	Davinia Jash	Flat 3 12 Fawley Road NW6 1SH	14/04/2015 21:35:10	OBJ	<p>I am objecting as the 10 year owner of Flat 1, 9 Dynham Road and the occupier of this flat for the past 3 years until last month. I would like to strongly object to this extension due to the significant loss of privacy that it will cause to my tenants or myself, should I decide to move back to my home.</p> <p>The extension and terrace will look directly into my kitchen and living room and the “obscure glazing” on the lower part of the windows that is proposed to minimise privacy loss will not resolve the loss of privacy to my flat as the extension will be on the same level as my first floor flat so the occupiers of both properties will be at eye to eye level. I have photographs of the view from my flat onto 5 Hemstal Road to help the committee understand my objection and would be very happy to share these with the committee to illustrate the issue.</p> <p>At a minimum I would request that the planning application be amended to include a commitment to maintain or extend the current treeline to preserve the privacy of my flat and any similarly affected homes on Dynham Road.</p> <p>This is currently provided by a beautiful cherry tree whose flowers provide a real lift to the soul at start of Spring as well as shielding privacy between the homes on the middle floors of Dynham Road and Hemstal Road for much of the year so it would be a great loss and shame for this to be cut back and/or damaged particularly as there is so little greenery in the street and gardens overall.</p> <p>I do hope you will take into account my feedback; as mentioned above I am available to provide any further information.</p> <p>Best wishes Davinia Jash</p>
2015/1380/P	Helen Steer	7 Hemstal Road	17/04/2015 09:29:14	OBJ	I have previously commented on the impact of this work on the light to 7 Hemstal road. I'd now like to object, as no work has been done to understand/ mitigate that impact (such as engaging an independent surveyor)
