2015/1667/P	Vicki Kelly	28 Rowntree Close West Hampstead london NW6 2NJ	14/04/2015 22:10:12	OBJ	<p>Unfortunately I am unable to see the plans and can not judge whether it will be close enough to put us in more danger so I will make the complaint anyway and let you see how it sits with the Rowntree close subsidence problem</p> <p>I have concerns about this extension being built due to the subsidence we have already suffered due to the work that has gone on over the railway and building opposite the railway. Twice while excavations were going on we have had movement. I have suffered a fractured gas pipe, my garden fence is falling out and my garden itself is now undulating. I had a wall around my patio which had to be taken down due to the fact that it cracked in half when the first lot of subsidence happened. The house itself has not suffered too much but there has still been some movement internally.</p> <p>At the front of the house there is a large lump and dip in the road and outside my front door and also a crack that runs down the road. I am worried that by digging new foundations it will make the problem worse and the ground will start moving again.</p>
