Dear Madam,

Customer Reference 184493 - Smart Homes Scheme Advice

I can confirm following a site visit, that took place on the 12th December 2014 by Russell Smith, Technical Co-ordinator for RetrofitWorks that the proposed works of installing external wall insulation to the side wall of your property is technically feasible using materials with low embodied energy. Moreover, we can confirm that the work will improve the overall thermal efficiency of your property and is worth pursuing.

Yours faithfully,

Russell Smith
Director of RetrofitWorks Ltd
