2015/1672/P	Mr Richard Allen	20 Menelik Road London	24/04/2015 22:38:52	OBJ	As a resident directly behind the school, my main objection relates to the construction of the new buildings as well as the potential use of floodlights and other artificial lighting, particularly that which may be used around the outdoor sports and recreation areas. The extent of building would cause un-neccesary noise and pollution in the area. The construction of the additional buildings as well as the artificial lighting would not only become a blight on the whole landscape, it would encourage use at anti social hours. The light pollution this would cause would be extremely problematic for the neighbouring properties. I strongly object to this commercial redevelopment.
