If this application goes ahead the planning officer must ensure that there is adequate marshalling of the vehicles which will need to be parked on the bend in the road (skips earth moving equipment/trucks, deliveries of material etc. During the current building at No. 53 B/c the parking of HGV's has endangered both traffic and pedestrians. If the building at 55 goes ahead it will be necessary to install temporary traffic lights and to ensure the pavement is not blocked.
