Planning application address 4, TASKER RD. NW3 2YR

I support the application (please state reasons below)   
I object to the application (please state reasons below)

Your comments

AS long term residents (43 years) of 5A, Tasker Rd we emphatically object to the proposed extensions to 4, Tasker Rd.

These are the last masonry houses designed by the innovative architect Walter Segal whose main interest was in designing attractive, attainable social housing. Although over the years these three family houses have more or less been sensitively modified the proposed first floor glass extension facing out to Tasker Rd will totally destroy the balance and line of the three houses as conceived by Walter Segal.

Our privacy will be affected by the added height of the extension and our view of St Dominics will be obstructed. As the change to No4 could possibly facilitate two lots of tenants the resulting problems with parking spaces and noise pollution could well affect our quality of life.

As we are an elderly couple (my husband is 87 yrs old) and we would like to continue living here we hope you will take our objections on board.

Thank you,

Please continue on extra sheets if you wish
