2015/1973/P	K Clive	97A Belsize Lane London nw3 5au W1S 1RX	04/05/2015 16:59:07	COMMNT	We have the same comment on this application as we made on 2015/1522/P. This relates to the front extension over the terrace blocking our view 30 metres down Belsize Lane to the east past the plane tree currently enjoyed from the side window of the front bedroom of our house. It will also affect the levels of light we receive in this bedroom. This is particularly so as the proposed material for the extension is black-stained timber and will reach so close to the plane tree that the light and view restrictions imposed will effectively extend across the width of both the extension and tree. This side window provides an important source of light to our bedroom as the other window faces the street and for privacy needs to have the blinds down permanently. All this will adversely affect our amenity and therefore this aspect of the planning application should be turned down.
