I have had no notification of this application from the council nor the property owner. Having been told that the application had been made, I can logged on to view t online. I can see no documents relating to the application, merely an outline description of the intention to build a new floor on the existing building. However, I have been told that the application is also for an external lift with a glass car running up the rear of the building. If that is the case I wish to attend any planning meetings to object to such a lift being installed, as awell as the building works themselves. My reasons are to do with invasion of privacy - such a lift would pass by my bedroom windows allowing anyone in the lift to look directly into my bedroom. Also, I am concerned that the operation of the lift will increase the noise disturbance that I am already subjected to from the property at 56 Hatton Garden, potentially at times outside of normal business hours i.e. early morning, late evening and weekends. |
