Planning application Ref 2015/1628/P - 10a Oakhill Ave, NW3 7RE

I strongly urge Camden to have a careful study of the water current flowing under a good part of Oakhill Avenue.

This is not a flat street, quite the opposite, and the present proposal extends the risk of soil subsidence even further than the previous application that was, most regrettably, approved. If this damage was to occur, there will be a serious risk of damage both to 10A and to 10 Oakhill Avenue buildings.

I must remind you of the destruction of precious trees that this proposal will bring about. Similar destruction of greenery will follow from works in the rear of the property.

Clearly this proposal aims at increasing the value of the property, with no regard whatever to the architectural character of the houses in this road. Most regrettable.

Therefore, I strongly object to this proposal.

Yours faithfully,
