Comment: SUPPORT
Response: I support this planning application. The houses on this estate are single family homes within a desirable residential area but with limited space for families with several children. Many, such as nr 56, would benefit from renovation and expansion that is visually and structurally non aggressive, and improves the energy efficiency of the dwelling. The plan that is being proposed seems to meet these criteria. I trust the applicants will do their best to minimise the disruption that inevitably occurs during a renovation process. Provided this is taken into account, I believe it is fair to allow residents to improve the quality and value of their property.
