Quote:
Extension "In principle the replacement single storey rear extension is considered acceptable. At a height of 3.0m and depth of 3.6m, the proposed extension would be subordinate to the host building in terms of its size and scale, and maintain a reasonable amount of garden space. Given that the proposed extension is 1.2m deeper than the existing extension, and is positioned in a rear garden area partly visible from the public realm on Kemplay Road, it will have an increased visual prominence. This is considered negligible however, as the increase in bulk is minimal, and would be overcome by the shielding effect of the trees within the property's rear garden as well as the high boundary wall abutting Kemplay Road. Thus it is my opinion that the development would not be overly obtrusive or have a significant impact upon the appearance of the host building or wider street-scene.
In terms of detailed design the choice of traditional brick would match the existing building fabric, and so allow for a sensitive development that complements the host building and its setting. Likewise the proposed arrangement of fenestration, whilst contemporary, complements the host building by virtue of its simple design. It is therefore my informal view that proposals would generally respect the character and appearance of the host building, and its setting within the Hampstead Conservation Area. The scheme would consequently comply with guidance in Camden Planning Guidance 1 (Design) and Council policies CS14, DP24 and DP25. "
