Benjamin Wallfisch

Dear Mr Tulloch

I'm writing regarding the effect the proposed development at 11 Rosslyn Hill London NW3 5UL will have at the neighboring world class recording studios AIR studios on Lyndhurst Road.

The underground noise pollution this development would cause would result in the studio having to close for 6 months or more. This would be a catastrophe for many thousands of working musicians in London, music producers and film composers from around the world who travel to Air to record their orchestral film scores. It is the best recording space in the world.

So I'm writing to officially register my objection to this plan. It absolutely should not proceed. The consequences to the London music scene as a whole are far too great to justify a residential development such as this. The knock on effect could be huge.

Thanks for your time.

All best

Benjamin Wallfisch  
film composer
